### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 20 March 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **DETAILED ACTION**

1. Claims 1-10 are presented for examination.
2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The current title is imprecise.

#### ***Priority***

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### ***Drawings***

4. Figures 1-3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

#### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

6. Claims 1 and 8 rejected under 35 U.S.C. 102(a) as being anticipated by Applicant Admitted Prior Art (AAPA).

As per claim 1, AAPA discloses a clock supply control apparatus which controls supply of a clock signal to first and second devices of a computer system [fig. 1], comprising:

Art Unit: 2115

a clock generating unit generating a clock signal [4, fig. 1; page 2, line 21];

a clock supply logic unit controlling supply of the clock signal from the clock generating unit to the second device in response to a clock control signal, the second device being operable with the clock signal supplied from the clock supply logic unit [page 1, lines 15-22; page 2, lines 21-24];

a controller setting the clock control signal at one of a clock supply inhibition level and a clock supply allowance level in response to a state of a clock run signal line, the resulting clock control signal being supplied from the controller to the clock supply logic unit [page 1, lines 17-24; page 2, line 28-page 3, line 9]; and

wherein the first device is operable with the clock signal from the clock generating unit and outputs an interrupt signal to an interrupt signal line regardless of whether the clock control signal is set at the clock supply inhibition level or the clock supply allowance level [fig. 2; page 3, line 25-page 4, line 12].

As to claim 8, AAPA teaches the claimed system. Therefore, AAPA teaches the claimed method of steps to carry out the system.

***Allowable Subject Matter***

7. Claims 2-7, 9 and 10 allowed over prior art. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest, individually or in combination, a control unit delays to supply of the operational signal to the device which outputs the interrupt signal in response to the delayed operational signal after the clock signal from the clock supply logic unit is received at the device.
